

Dear Ladies and Gentlemen,

Only the very best is good enough for you !

In this edition of our product information No. 6 we will advise you on all the mechanical, electronic parts and components of the highest quality, state of the art, items that guarantee the best possible precision, longest lifetime and stability during daily print production. This quality ensures the lowest cost in technical servicing and maintenance. This enables the best production speed without breakdown using this large format digital printing machine for all kinds of soft-signage and textile applications. All of these parts and components are available worldwide.

T-REX Machine Concept, Layout and design, Made in Switzerland.
Latest generation of Konica-Minolta Print Heads type KM 1024i

And further more:

- Professional high precision motors and control system from Panasonic, Japan
- High precision noise free railguide from THK, Japan
- Programmable Logic controller (PLC) from Omron, Japan
- High speed Data transmission via fibre optic cables
- High precision linear scale from Lika, Italy
- Cable guide from Igus, Germany
- Electrical parts from Schneider, France
- High performance drying unit for fast print speeds
- Spread roller for regular tension of the fabric during automatic fabric feeding

Specially developed broad band roller technology for a complete Precise glass scale and runners from Lika, Italy. wrinkle free material and fabric transportation.

Most important is the continuous and complete drying technology of our high performance and machine integral drying system, ink drying through the full fabric thickness, developed for the highest printing speed and production capacity.

Integral and high performance ink drying system

At any time we can demonstrate the T-REX 320 in the daily and practice oriented print production.

Please arrange a personal visit to our factory in Switzerland. We will be glad to welcome you.
